Rev 2
MADE IN THE USA

Kit:

- ① anti-glare guard
- ② (2) T-15 torx plastic screw

Tools necessary:

- ① masking tape (optional)
- ② magnetic bowl (optional)
- ③ magnetic finger glove (optional)
- ④ 1/4" extension
- ⑤ 1/4" driver
- ⑥ T10 torx bit
- ⑦ T25 torx bit
- ⑧ T15 torx bit

We recommend using masking tape because it will hold the nut in, while you do the rest of the install.

- ① Use a T25 torx bit to remove the (2) front windscreen fasteners. You can use a little masking tape or a magnetic finger glove to hold the nut on the back side of the windscreen mounts.

- ② (a) Loosen the two adjustment knobs for the windscreen and (b) rotate the windscreen back so you can access the bezel screws.

Pay attention to how tight the bezel screws are. When you put the anti-glare guard on and put the new screws in, tighten to as close to the same spec as OEM as possible.

- ③ Using a T10 torx tool, remove the (2) screws that hold the headlight front bezel. (one on the left and one on the right)

- ④ Put the Anti-glare Guard on top of the bezel. Using a T15 torx bit and an extension, attach the guard using the supplied screws.

- ⑤ Using a finger to hold the nut in place, and a T25 torx bit and driver, put the OEM fasteners back that hold the wind screen. Do not forget to tighten the adjustment knobs!

- ⑥ Check to make sure your adjustment knobs and windscreen fasteners are all tightened appropriately.

CONGRATULATIONS!
